Investment Thesis 1: Top-Line Growth to Accelerate

Securitas

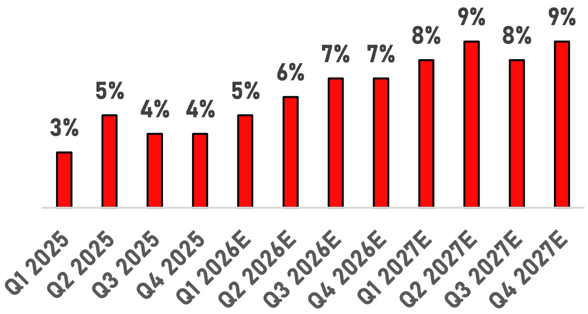
Organic Growth Forecast

Comments From CEO

" it's quite obvious to us as well that we get done with some of the structural work and the heavy lifting and the cleaning. We're largely done with that now, and that also means that we can then also start to shift focus on more profitable growth going forward "

– Magnus Ahlqvist 2026

Organic Growth Forecast



Strategic Phase Shift

2022 | 2025 | 2026 | Future

- **2022:** Securitas acquired Stanley Security
- **2025:** Integration of Stanley Security in Europe finalized.
- **2026:** Stanley Security fully integrated in North America H1, 2026.
- **Future:** Focus shifting from integration and deleveraging to growth phase.

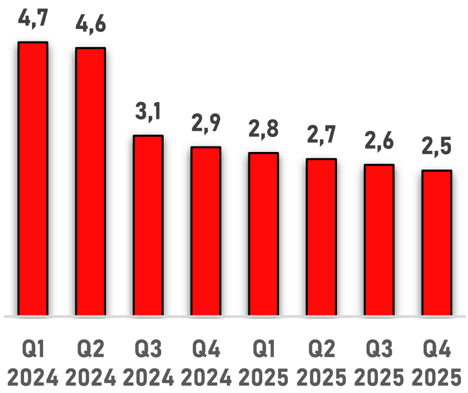
Strong Financial Position Enables M&A-Activity

The Latest Acquisition

liferaft

- ❑ ARR: MSEK 138 (USD 15.3m) end-2025
- ❑ Organic growth: >30%
- ❑ Capital-light acquisition (no new debt)

Net Debt / EBITDA

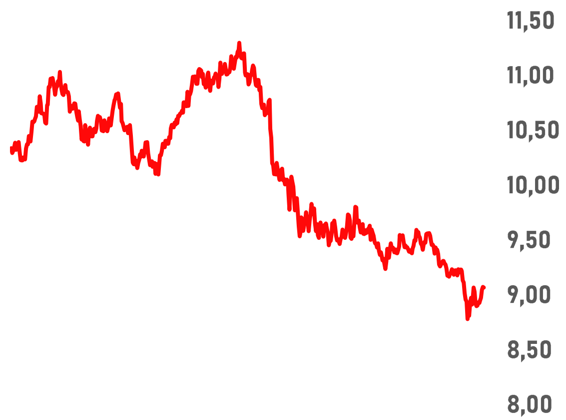


FX-Headwinds to Calm

Last Two-Years USD/SEK

- ❑ Strong SEK creates FX headwinds in 2026
- ❑ Negative translation effect on reported revenue and EBIT in SEK
- ❑ Less of a headwind going forward as year-over-year comparisons ease

Last Two-Year USD/SEK



Investment Thesis 2: Improved Sales Mix Deserves Historical Premium

Securitas

Share of Technology & Solutions

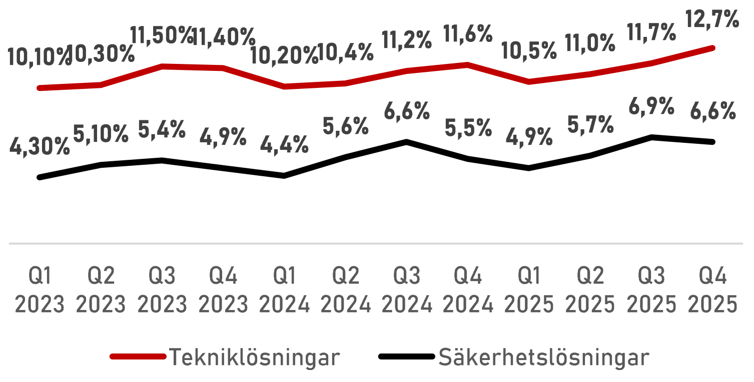
1 **Sales Mix Shift**
Technology & Solutions segment rose to **34%** of group sales in 2025 up **12pp** since 2020.

2 **Margin Advantage**
The Technology & Solutions segment delivers **12,7%** operating margin vs. **6,6%** for guarding.

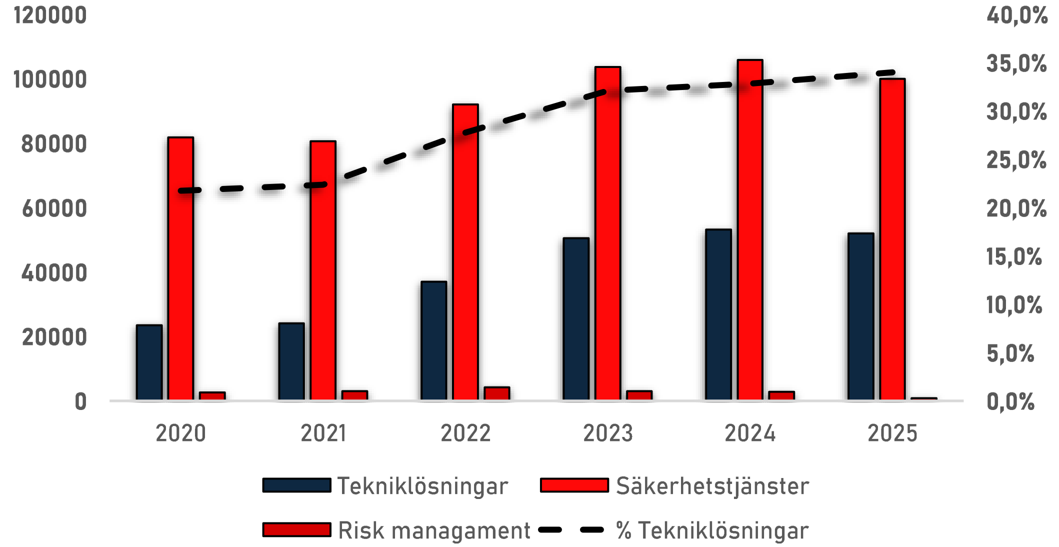
3 **Stronger Moat**
Segment offers a wider **MOAT** compared to traditional guarding. Therefore, **Securitas** should trade at a **premium multiple** compared to historic data.

Technology Segment Offers Better Margins

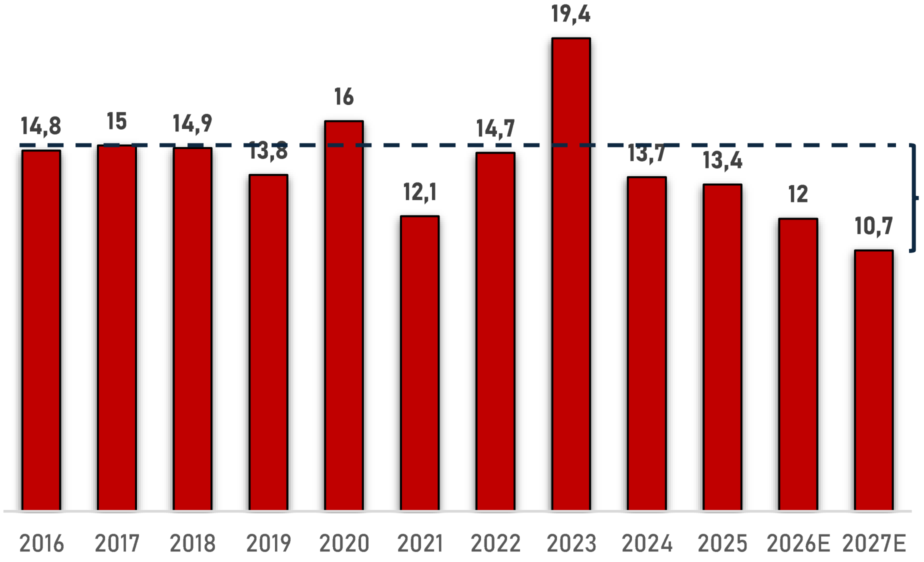
Technology solutions generate higher margins for Securitas than traditional guarding services because they are less labor-intensive and more scalable. While guarding relies heavily on personnel and is exposed to wage inflation, technology solutions such as remote monitoring and electronic security have higher upfront costs but lower marginal costs once installed. As Securitas increases the share of technology in its offering, this supports margin expansion, improves scalability, and reduces sensitivity to labor cost pressures.



Technology on the Rise



Valuation Discount



Large Gap Between Historical and Forward Valutation

Investment Thesis 3: IAC-Costs to End Going Forward

Securitas

Comments

IAC Costs
Securitas has had lots of integration costs related to the integration of Stanley Security. On top of this a series of divestments of unprofitable buisness contracts has led to significant writedowns

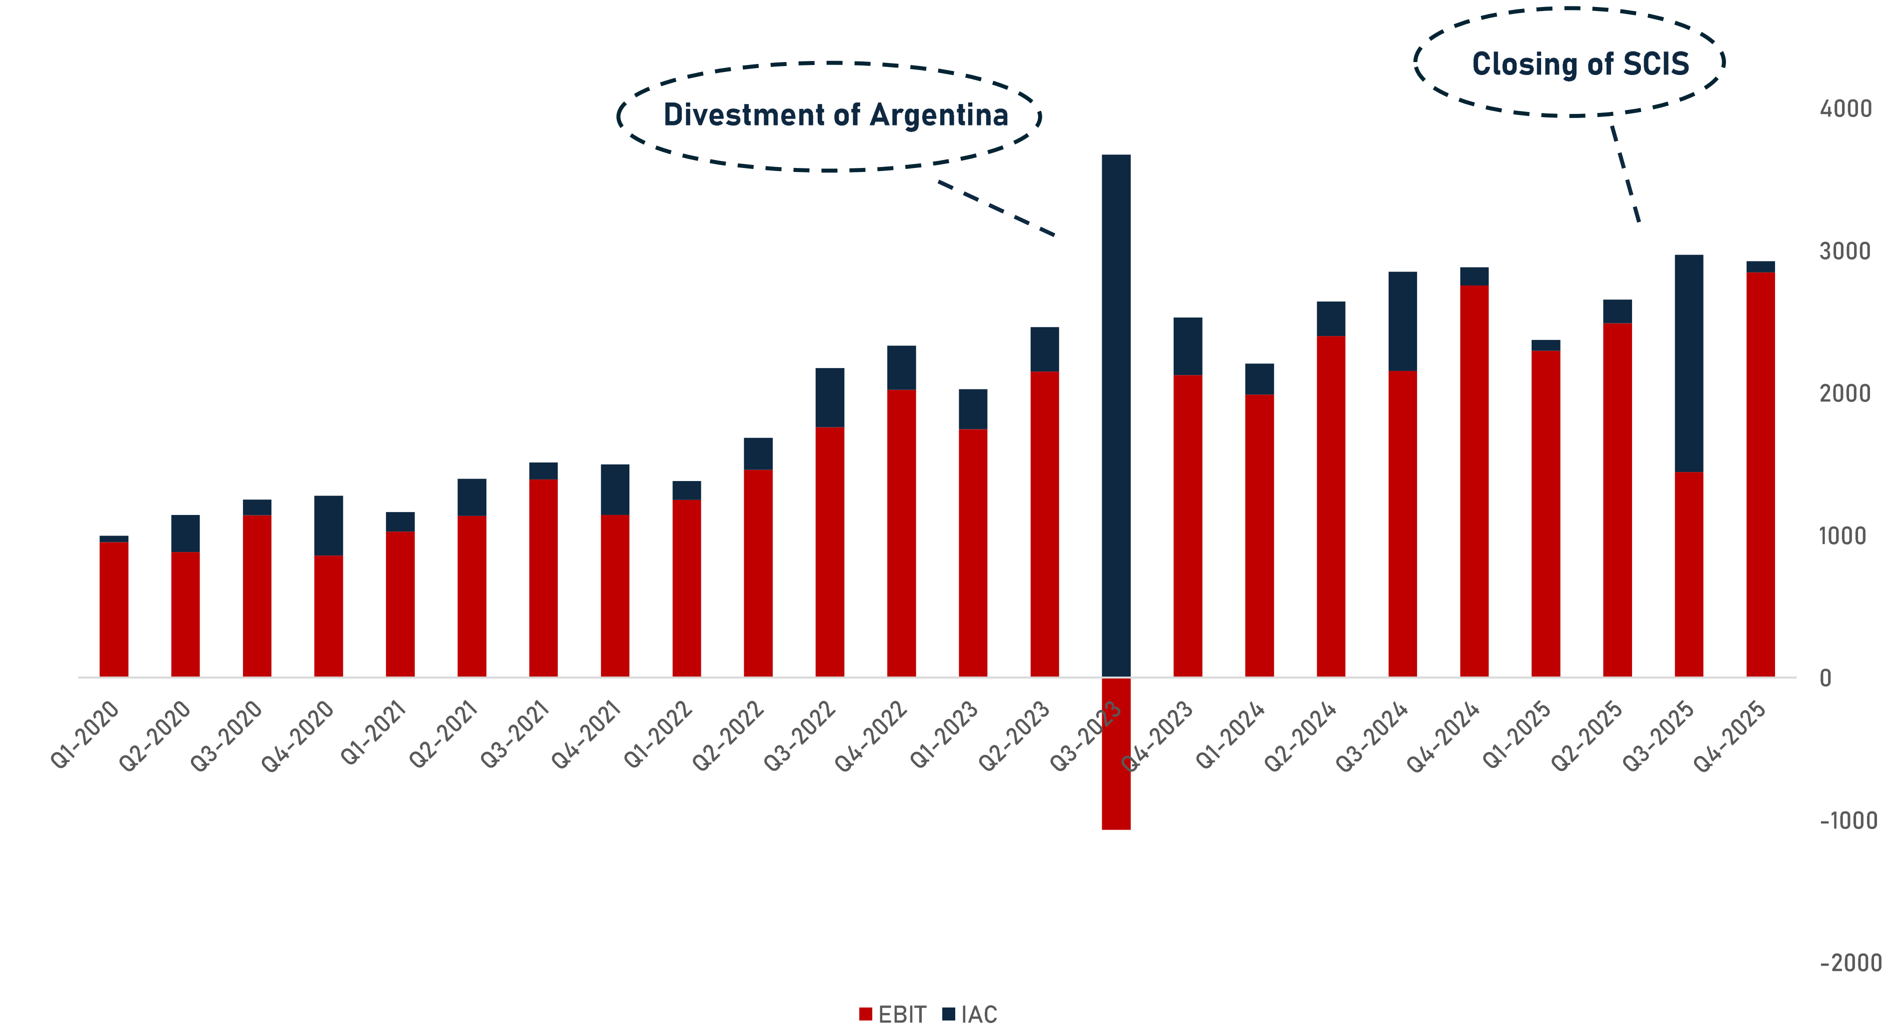
Major Events

- Divestment of Argentina Q3 2023
- Divestment of airport business in France
- Shutdown of Securitas Critical Infrastrucure Services (SCIS)

Outlook
Going forward management believes there will be no significant IAC-Costs

IAC = Items Affecting Comparability

Underlying EBIT Adjusted For IAC



Peer Valuation

Premium	20%										
Upside						35%	32%	30%	32%		

Conclusion

We arive at our peer valuation by weighting 50/50 between P/E and EV/EBIT on 2027E. We also used a 20% multiple premium on **Securitas** due to lower risk premie due to market cap size and buissness stability.

Using these assumtions we arrive at an fair share price of **208 SEK** implying an upside of **32%.**
