Executive Summary

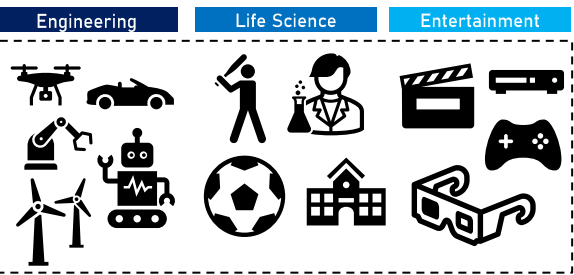

Executive Summary Slide Template

Company Facts

- Qualisys is a Swedish motion capture technology company, founded in Gothenburg in 1989.
- The company develops and sells integrated motion capture systems combining high-speed cameras, software, and accessories for precise motion measurement and analysis.
- Its operations are organized into three business areas: Life Sciences, Engineering, and Entertainment

Products Usage

- Life Sciences accounted for 59.6% of revenue in 2025 and includes typical customers such as universities, research institutes, hospitals, and medtech companies.
- Engineering represented 38.4% of revenue and typically serves research institutes, universities, and customers within robotics, autonomous vehicles, drones, and marine energy.
- Entertainment made up 2.0% of revenue and mainly covers customers in gaming, film, TV, and creative studios using motion capture for animation.

Investment Thesis

- 1

IPO Hangover, No Sellers Left

Post-IPO sentiment has deteriorated as institutional holders - including Handelsbanken Fonder, Nordnet, and Avanza - reduced positions materially, pressuring the share price. Insiders have been consistent net buyers throughout. We believe this technical selling has pushed the stock far below fundamental value, creating an attractive entry point.
- 2

Overreaction on the Disappointing Q1 Report

During 2025, Qualisys faced pronounced headwinds from U.S. tariffs and adverse FX movements. We believe these pressures are now largely behind the company. A strong order backlog and elevated customer intake in 2025 are set to convert into reported revenues in 2026, while FX headwinds ease.
- 3

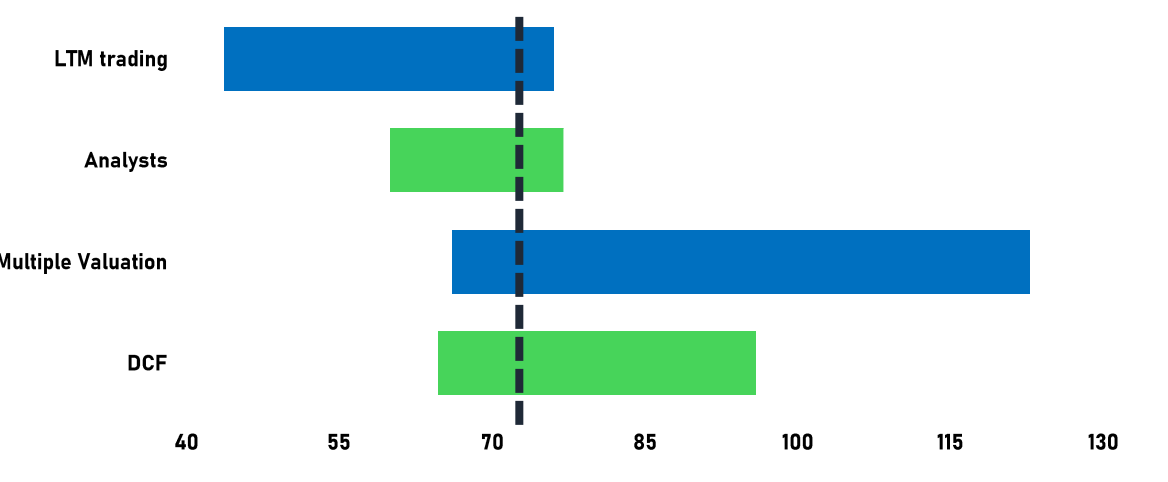

Smoother Earnings, Higher Multiples

As Qualisys' commercial customer base scales, revenue stability improve. The OnTraQ subscription platform introduces a recurring revenue stream that will structurally reduce earnings volatility. Since public markets systematically re-rate companies as earnings become more predictable, we expect this transition to drive multiple expansion - independent of underlying top-line growth.

Financial Development

Quality Checklist

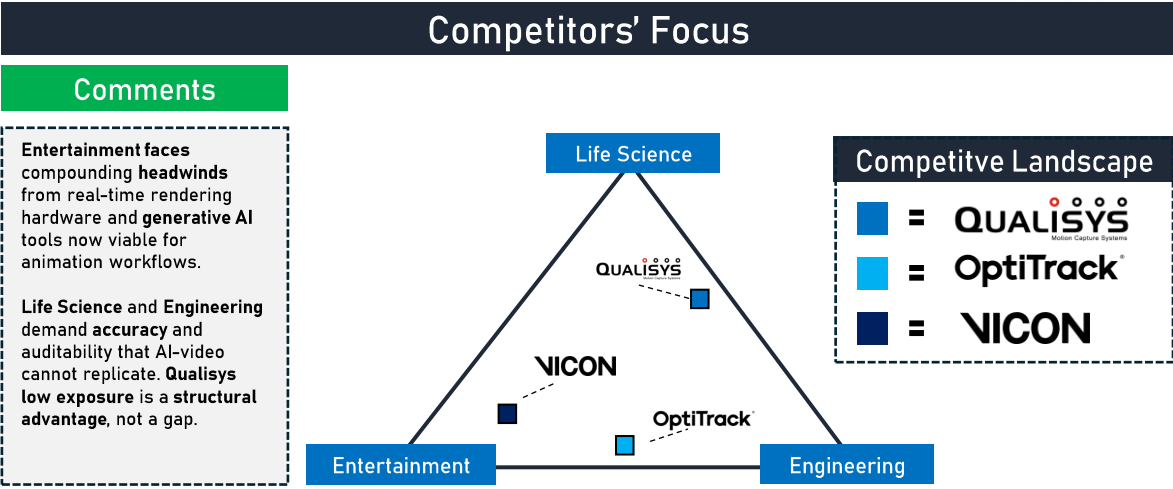

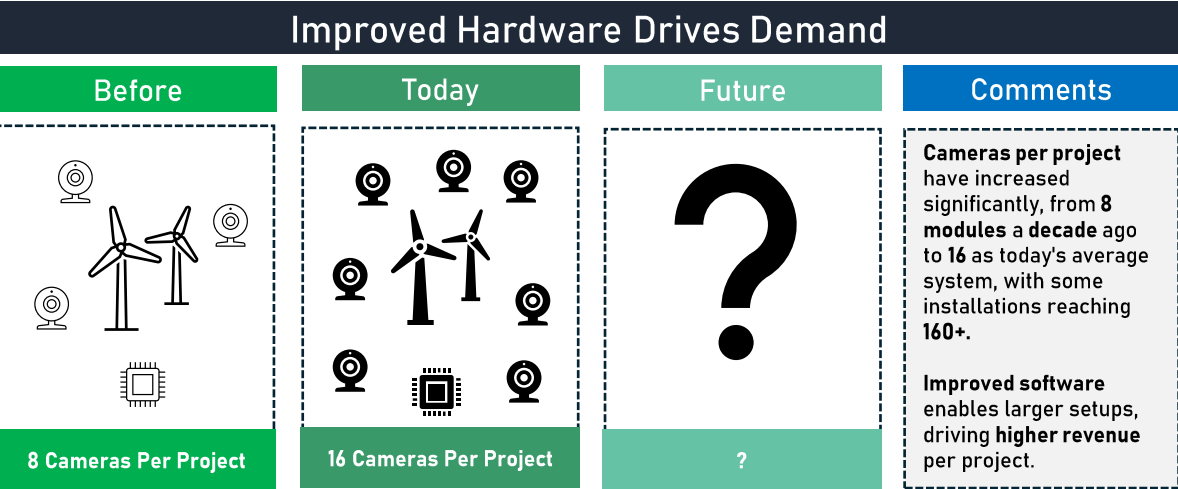

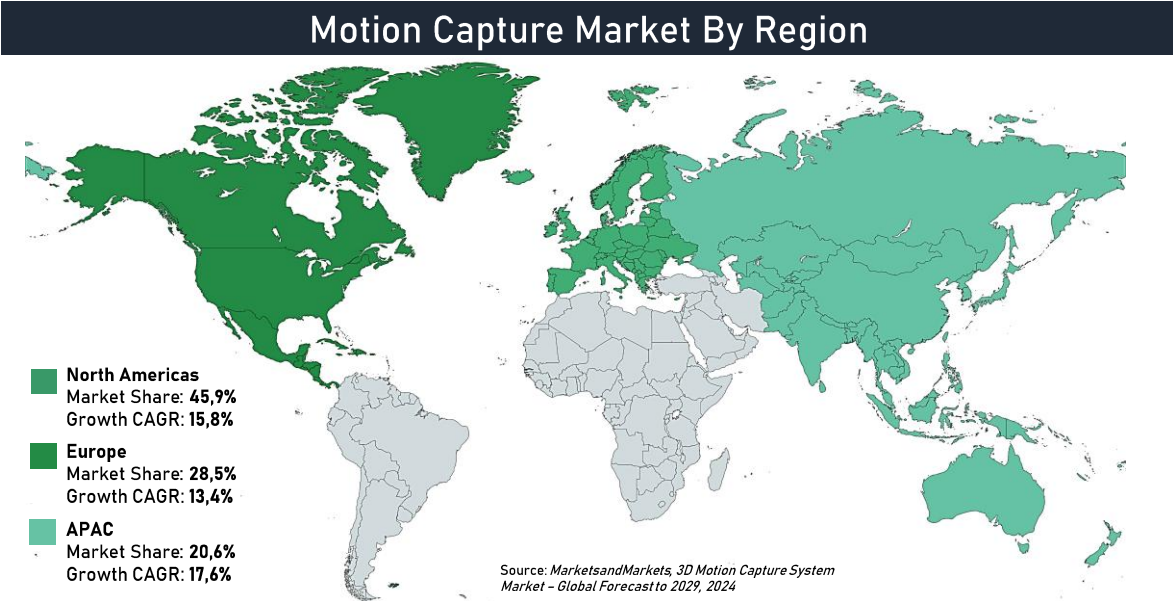

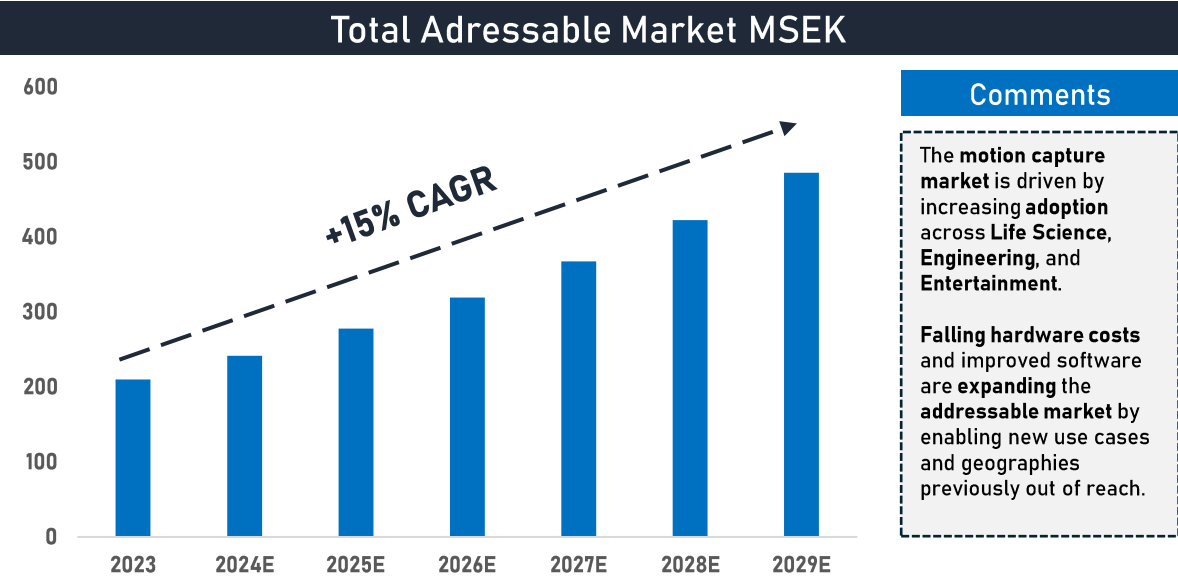

Founder-retained equity	Co-founders remain active shareholders & board members	✓
High margins	72% gross margin, 20% EBIT margin	✓
High market share	Global niche leader in motion capture	✓
Low customer concentration	700+ customers, largest 8% sales	✓
Net cash position	No balance sheet risk	✓
High FCF conversion	Asset-light model converts earnings to cash	✓
Insider buying	27 buys, 0 sells from insiders since IPO	✓

Business Model

Market Overview

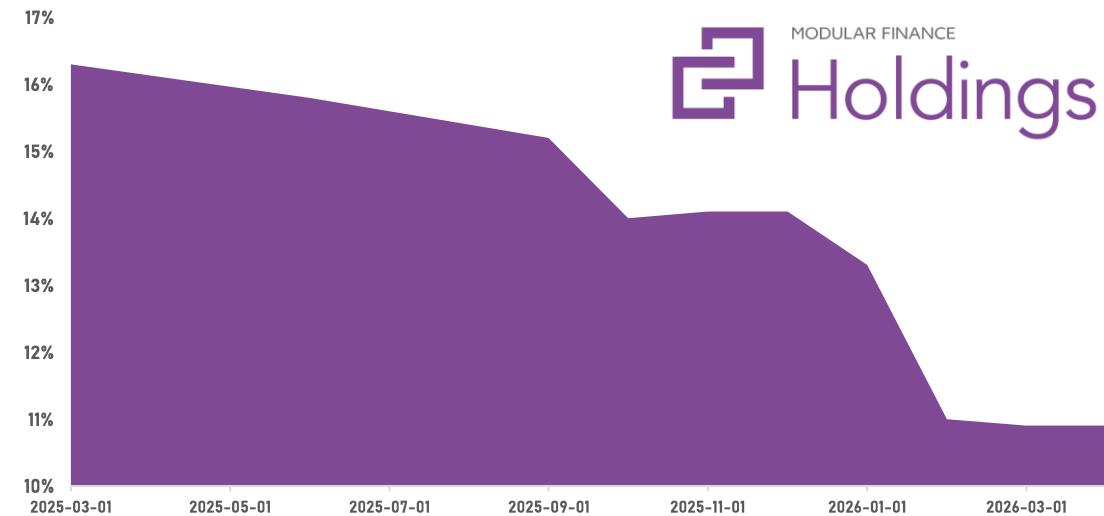

Solid underlying growth

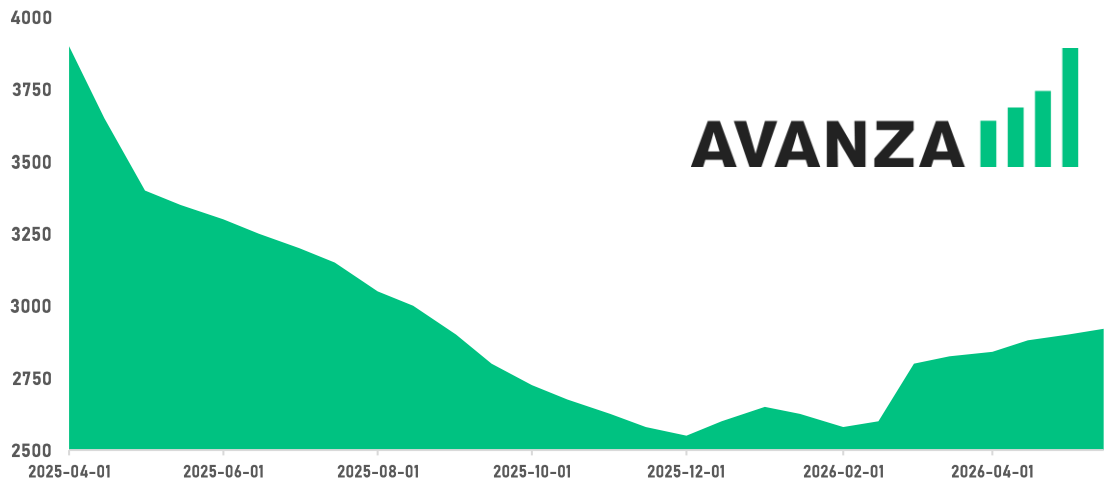

Investment Thesis 1

IPO Hangover, No Sellers Left

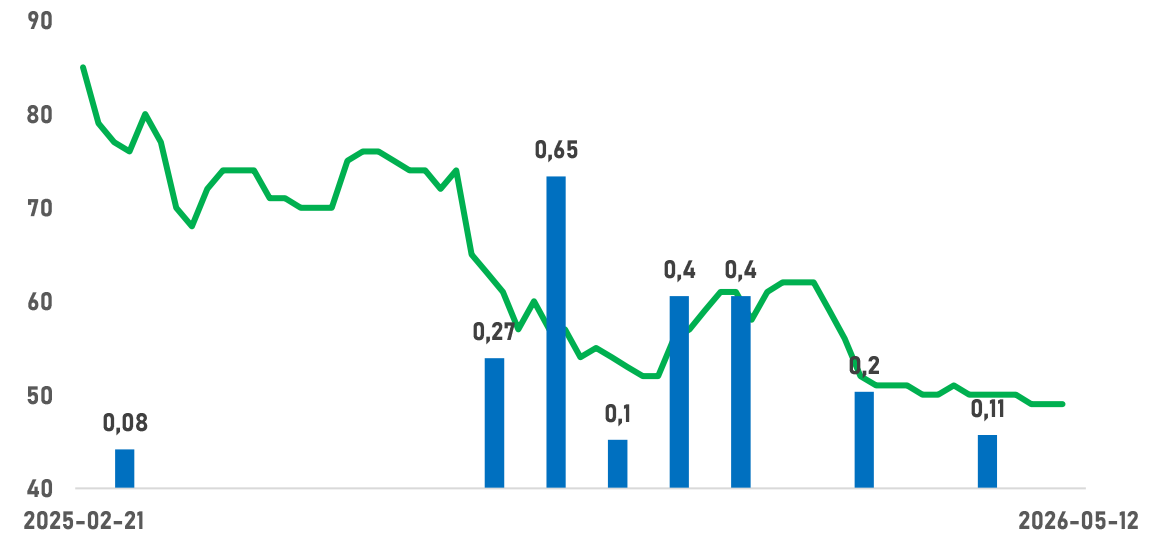

Institutional Ownership (%)

Retail Has Given Up On The Stock

Insider Transactions vs Stock Price (MSEK)

Declining Institutional Ownership

Retail Has Given Up

Insider Confidence Remains High

- **Institutional ownership** has declined by c. **6%** since IPO.
- **Handelsbanken** reduced its stake by c. **3.5%** of the company between Jan-Apr 2026.
- We view this as broad **de-risking** rather than **weaker fundamentals**.

- **Avanza sole bookrunner** with exclusive IPO rights.
- **Strong pre-IPO media attention** and buy recommendations.
- Retail selling appears driven by price action, not fundamentals

- All reported insider transactions have been **buys**.
- Insider buying persisted despite share price weakness.
- Signals confidence in current valuation.

Investment Thesis 2

Overreaction on the Disappointing Q1 Report

Q1 Report In Short

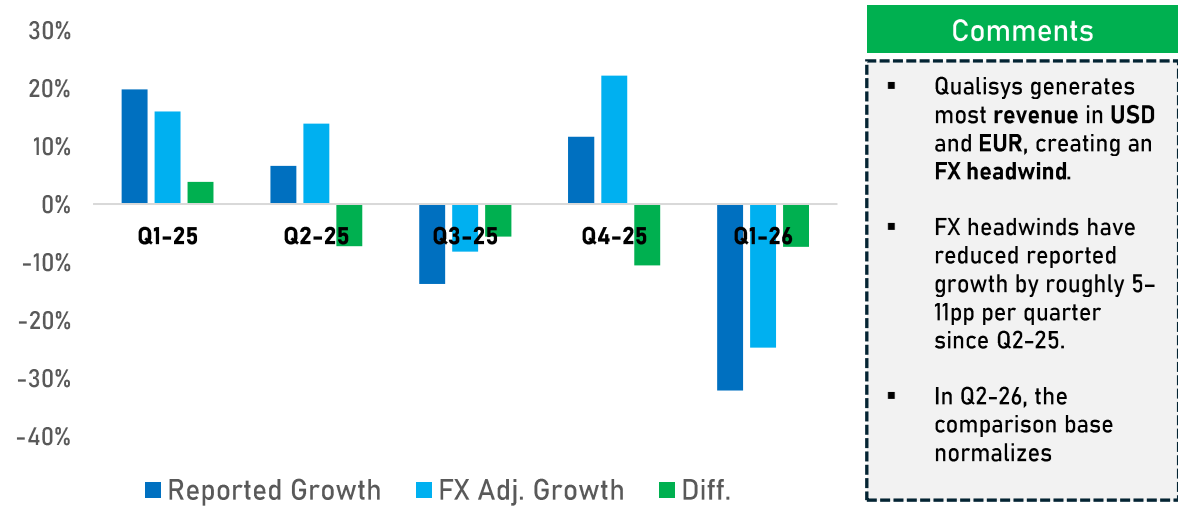

Income Statement Q1 2026			
	Jan-March		
	2026	2025	%
Total Revenue	43,3	62,9	-31%
Gross Profit	30,6	44,8	-32%
GM (%)	70,7%	71,2%	-1%
EBIT	-3,6	5,6	-164%
EBIT (%)	-8,3%	8,9%	-193%
EPS	-0,36	1,2	-130%

Extremely Weak Sales Development

Strong gross margin despite sales drop

Qualisys EBIT-margin turned negative in Q1

FX-Headwinds To Ease In Q2

Comments

- Qualisys generates most revenue in USD and EUR, creating an FX headwind.
- FX headwinds have reduced reported growth by roughly 5-11pp per quarter since Q2-25.
- In Q2-26, the comparison base normalizes

Key Take-aways From Conference-Call Q1 2026

No Customer Churn Great Visibility Order Book Up YoY

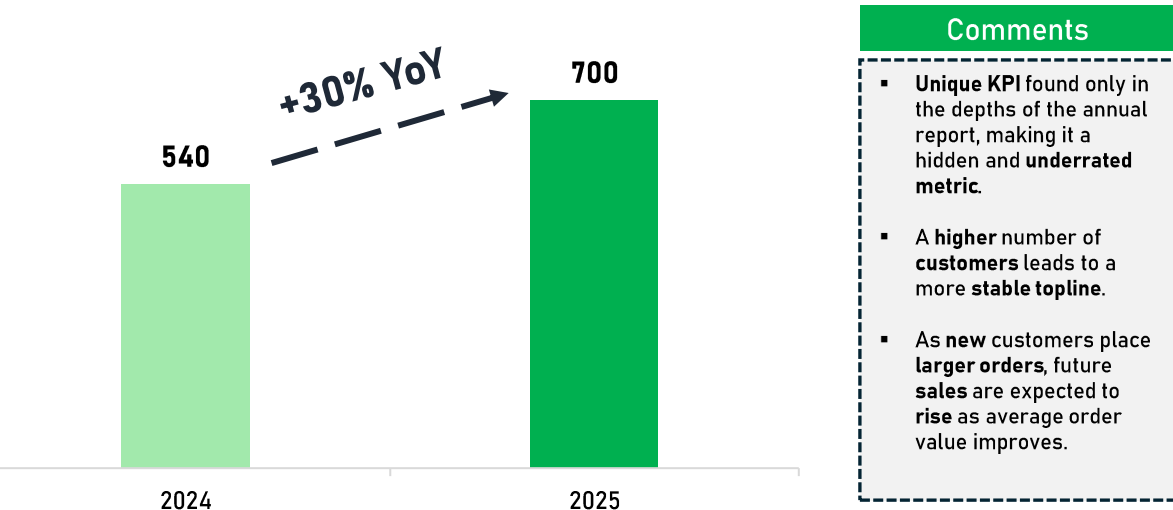

“Despite weak revenue in Q1, we saw no customer losses; rather, certain orders were delayed into future periods.”
- Ingmar Pettersson

“I basically have half a year’s visibility of how topline will be”
- Ingmar Pettersson

“Looking at the overall picture, things are stable. We see no reason why we should not be able to execute on what we have set out to do without having to “shoehorn” anything in.”
- Ingmar Pettersson

Number of Unique Customers

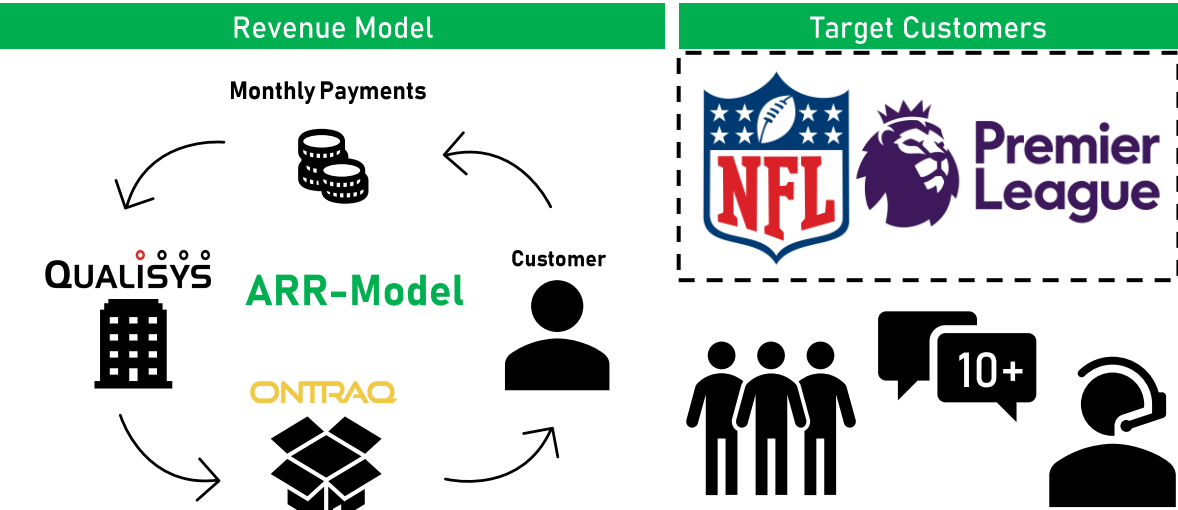

Comments

- Unique KPI found only in the depths of the annual report, making it a hidden and underrated metric.
- A higher number of customers leads to a more stable topline.
- As new customers place larger orders, future sales are expected to rise as average order value improves.

Peers

Comments

Peer selection: We identified a peer group of four Swedish small-cap technology companies sharing key characteristics with Qualisys: (i) proprietary hardware/software platforms with high integration depth, (ii) primary exposure to life science or medtech (iii) a significant share of recurring or subscription-based revenue.

Peer weight: We decided to weigh the peer valuation even between **median EV/S 2027E** and the **median EV/EBIT 2027E**. This results in a target price of **82,3 SEK** representing an upside **75,5%**.
